

Chapter Safety Services

Free and low cost safety services available for our chapters:

Chapter Discount Program

AWCI will provide volume discounts to Chapters purchasing software for their members. The software is supported by instructional workshops that encourage the delegation of administrative tasks to clerical workers.

Instructional Workshops

An instructional workshop has been developed for AWCI Software users. The workshop provides an overview of OSHA regulations and enforcement. It trains administrative personnel to effectively use the software to develop an on-going and compliant safety program. Workshops can be provide at your selected location or through an internet web meeting.

Safety Support Programs

AWCI will assist Chapters in establishing an ongoing safety support program. Programs are developed to address the specific needs of the Chapter. Services may include user group meetings, custom web pages, and local strategic partnerships.

Chapter Award Programs

AWCI will assist chapters in conducting their own safety award program. There is no charge for this service. All we ask is your assistance in encouraging members to participate in our national safety award program.
